# 1 Introduction

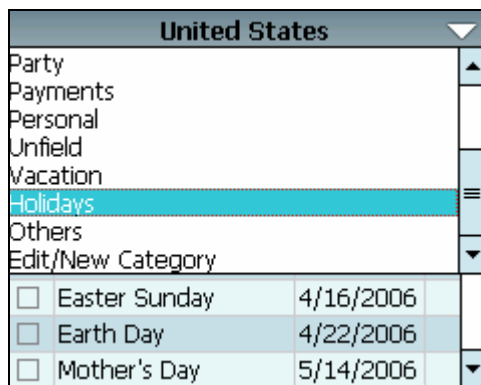

Mobile Dates - Get holidays, reminders, alerts etc in advance on your Handheld. Upcoming holidays are sorted in order of region and religion. With this you can also add new events like Birthdays, Anniversaries etc.

<b>Category List</b>	Select the event category. E.g. Holiday, Birthday, Anniversary etc.
<b>Ex</b>	If the event(s) is exported to Calendar the column Ex for that event(s) will display 'A'
<b>Notes</b>	The notes column displays the notes for the event (s).
<b>Set</b>	Select the event(s) you want to export to Calendar & tap on Set.
<b>Remove</b>	Select the event(s) you want to remove from Calendar and tap on Remove.

## 2. Categories

There are various categories and sub-categories according to which events are sorted. You can view/add events according to their categories. To choose a category, tap on the category list.

**There are various categories to choose from-:**

Anniversary	Birthday	Business	Entertainment
Friends	Holiday	Memorial	Party
Payments	Personal	Unfield	Vacations

There are sub categories under holidays where holidays are sorted according to religion and country. You can select either religion or country according to which you want to sort the events.

### Religion

Following is the list of religions.

Christian
Jewish
Hindu
Islamic

- To add an event to Palm Date book select the event(s) you want to export to Datebook & tap on Set.
- 'A' will appear next to the exported events.
- You can also export an event to the calendar by using Menu.

---

## 5. Installation/Uninstallation

---

### Requirements:

- You need to have MS ActiveSync Software or Mobile Device Center 6.1 on your desktop PC and make sure your device is connecting with Desktop PC.
- **.Net Framework**

To install the .net framework, check the NetCF option while installing the program, selected by default.

Alternately you can download & install the .Net Framework from the following links in case the system prompts for missing runtime files.

- **Pocket PC (.Net Compact Framework)**

<http://www.microsoft.com/downloads/details.aspx?familyid=9655156b-356b-4a2c-857c-e62f50ae9a55&displaylang=en>

- **Desktop (.Net Framework)**

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5&displaylang=en>

### Steps to Install PRPDates.

- You need to have MS ActiveSync Software or Mobile Device Center 6.1 on your device and make sure your device is connecting with Desktop PC.
- Run **PRPDatesPPC.exe** and follow instructions.
- When finished, go to Start Menu>>Program, here you will see the Icon of PRPDates.

### Steps to Uninstall PRPDates program.

To remove the product from your Pocket PC:

- Go to **Start menu >> Settings.**
- Select **System** Tab and tap on **Remove Programs.**
- Select PRPDates from the list and tap on the Remove button.
- Choose **"Yes"** to confirm removing.
