1 Introduction

Carry all your vital information with this **Secure, Safe, Convenient & Powerful** personal information management solution. Store passwords, PINs, bank account, credit cards, email usernames, group IDs, membership IDs & any other important information.

Wallet is a secure Personal information Manager. It manages all your personal information. By default sample wallets will be displayed.

UP Button – Returns to parent directory.

Tree View

List & Tree View Toggle.

Large Icon View

Keyboard (SIP)

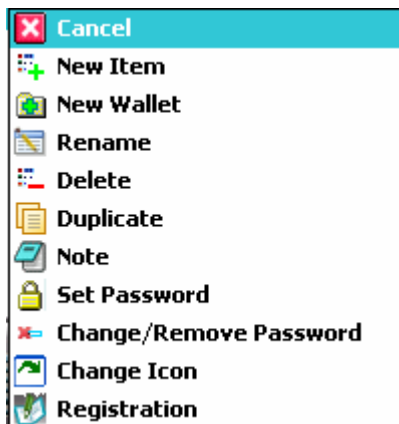

Menu.

2. Creating & Managing a Wallet

You can create Wallets to store personal information like your credit card details, your email ids and passwords, PINs etc.

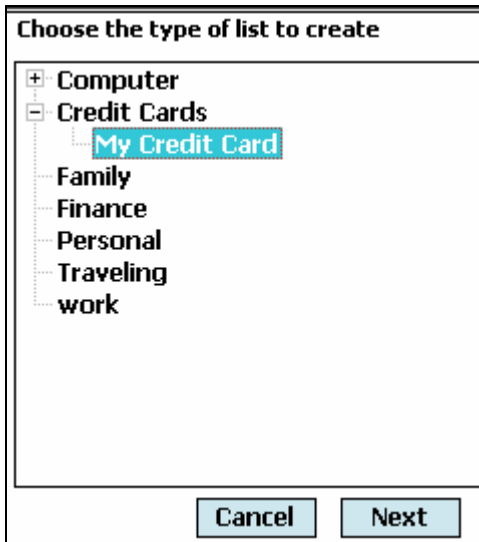

- You can create a new wallet by selecting New Wallet from the Menu.
- Enter a new Wallet Name.

- To **rename** a Wallet, select the folder and select "Rename" option from the Menu. Enter a new name and tap on ok.
- To **delete** a Wallet, select "Delete" option from the menu and tap on ok.

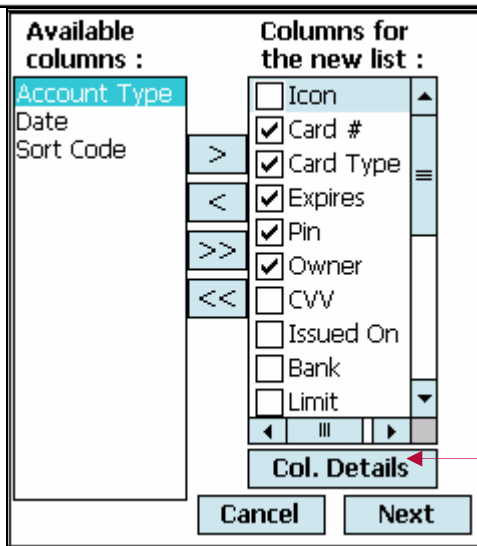

3. Creating & Managing Items

After creating the Wallet you can start by creating different lists from the sample categories such as Credit cards, Finance, Computer etc. After creating a Wallet you can store information such as credit card information, Email account information etc. in list form.

To create a new item

- Select the "New Item" option from the Menu.
- Select type of List to be added for instance in the screenshot My Credit Card is the type of list under Credit Card.

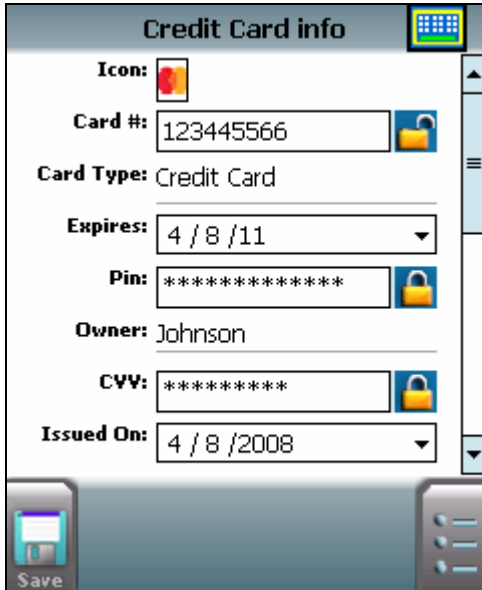

- A List of columns is available by default. You can add new columns to the list or remove the unwanted.
- Check the Primary column which will be used to sort the table. For example the primary column of a Credit Card list will be the Card (Number).

Create new columns for the list.

Adding new records to the List

After creating a list start creating records for the list.

The screenshot shows a mobile application interface for editing a credit card record. The title bar reads 'Credit Card info' and includes a list icon. The form contains the following fields:

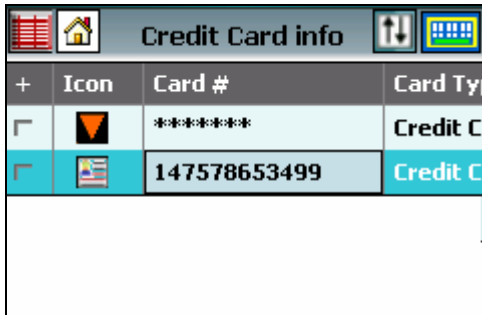

- Icon:** A small red and yellow icon.
- Card #:** A text field containing '123445566' with a lock icon to its right.
- Card Type:** A dropdown menu set to 'Credit Card'.
- Expires:** A date picker set to '4 / 8 / 11'.
- Pin:** A text field containing '*****' with a lock icon to its right.
- Owner:** A text field containing 'Johnson'.
- CVV:** A text field containing '*****' with a lock icon to its right.
- Issued On:** A date picker set to '4 / 8 / 2008'.

At the bottom left, there is a 'Save' button with a floppy disk icon.

- To add a new record select New Record from the menu.
- Enter all the information.
- You can also edit the values in the list i.e in this case values for the Card type, by selecting 'Edit Values' from the list.
- To Copy/Paste a value use the cut, copy/paste function from Menu.

- Tap on 'Save' button to save the record and exit the item edit view.

The screenshot shows the 'Credit Card info' list view. The title bar includes a list icon, a home icon, and a refresh icon. The list contains two entries:

	Icon	Card #	Card Ty
+		*****	Credit C
+		147578653499	Credit C

You can view the encrypted value directly without going to the item edit view by tapping on the encrypted value.

You can go to the Card View directly by tapping on the icon.

4. Setting/Changing Password

Set Password

Password: *****

Re-type Password: *****

Security question:
at was the name of your first school?

Your Answer: abc

Generate password **Clear password**

Paste

You can assign password to a particular List by selecting the List & then selecting Set/Change password from the Menu. After setting a password, a password request screen will pop up every time you try to access the list.

Set / Change Password.

- You can Set/Change password for the list by selecting Set Password/Change Password either from the Menu or from the context menu (tap & hold on the list).
- With the Generate password option you can generate random passwords.
- To remove password of a particular list tap on 'Clear Password'

Enter the Password

A	B	C	D	E	F
G	H	I	J	K	L
M	N	O	P	Q	R
S	T	U	V	W	X
Y	Z	.	Caps	123	CLR

Password Generator

Strength: Strong

Length: 6

Lower Case Letters

Special Characters

Upper Case Letters

Brackets(...)

Number

Password: GCOL9R

Generate **Cancel**

Copy

To generate a password:-

- Set your criteria for the password as shown in the screenshot.
- Select 'Generate'.
- Copy the Generated password or 'Generate' a new one.
- Paste the password for the List as shown .

5. More Tools to Manage Wallets

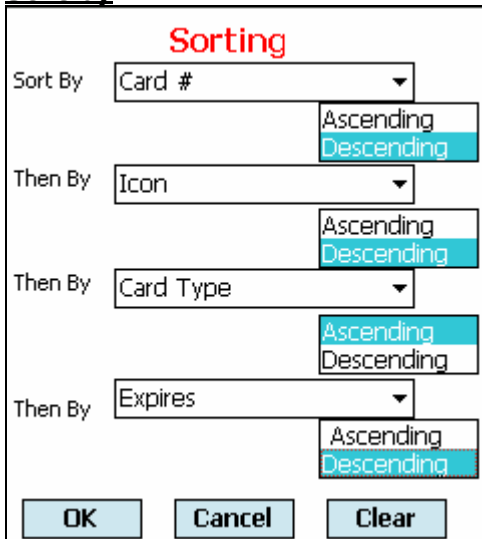

- **To Duplicate** a record, select the item to be duplicated from the list and then select "Duplicate Items" from the Menu/Context Menu.
- To **rename** an Wallet, select "Rename" from the Menu/Context Menu.
- Delete a record by tapping on "Delete" from the Menu/Context Menu.

- You can **add/Edit note to the list** and view the note by selecting "Note View" from the Menu/Context Menu.

Sort by

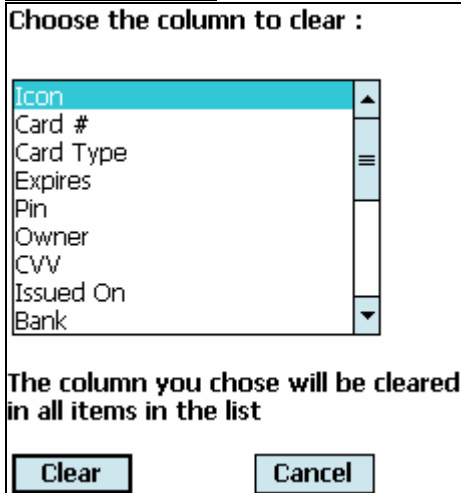

You can sort records by their columns in ascending/descending order.

Change icon

To change icon select the list or Wallet for which you want to change the icon and select "change icon" from the Menu. Choose from the list of icons displayed.

Clear columns

Select the columns & then tap on 'Clear' button to clear the values in those columns. This is useful when you want to reuse the same Itinerary list.

6. Card View

Information is displayed on a Card View which is customizable according to the type of card. A list of Card Templates is available which can be selected at the time of adding an Item into the wallet.

To View a record in card view select Card View from the menu or click on the record.

Select a card from the folder view. Additional information is displayed below the card in case there are more number of columns than what can be present on the Card View.

Edit Card View

- Add a new field tapping on "Add Field" from the context menu. Select the field from the list and tap on "Done".
- Make a note by selecting Note from the context menu.
- Change the card background by selecting Change background image and select from the list of templates.

Note: You can rearrange the fields by dragging them. Use the context menu (Tap and Hold) to delete, add, Change background, and make a note for the selected field.

7. Installation/Uninstallation

Installation

Requirements:

- You need to have MS ActiveSync Software or Mobile Device Center 6.1 on your desktop PC and make sure your device is connecting with Desktop PC.
- **.Net Framework**

To install the .net framework, check the NetCF option while installing the program, selected by default.

Alternately you can download & install the .Net Framework from the following links in case the system prompts for missing runtime files.

- **Pocket PC (.Net Compact Framework)**

<http://www.microsoft.com/downloads/details.aspx?familyid=9655156b-356b-4a2c-857c-e62f50ae9a55&displaylang=en>

- **Desktop (.Net Framework)**

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5&displaylang=en>

Steps to Install PRP Wallet.

- You need to have MS ActiveSync Software or Mobile Device Center 6.1 on your device and make sure your device is connecting with Desktop PC.
- Run **PRPWalletPPC.exe** and follow instructions.
- When finished, go to Start Menu>>Program, here you will see the Icon of PRPWallet.

Steps to Uninstall PRPWallet program.

To remove the product from your Pocket PC:

- Go to **Start menu >> Settings.**
- Select **System** Tab and tap on **Remove Programs.**
- Select PRPWallet from the list and tap on the Remove button.
- Choose **"Yes"** to confirm removing.
